HELLO March

Forming friendships

This month, we had the joy of joining forces with the **DeSanto Centre for the Deaf!** Their visits are always a highlight as they bring opportunities to build new friendships through music, dance, and parachute play. We love getting together, learning from one another, and especially enjoying the chance to learn sign language from them. These moments remind us how friendship can grow in so many ways.

Ng'andu School

Fight
Period
poverty

This month, we had the privilege of visiting Ng'andu School in the village to host an All About Periods workshop for the Grade 7 and 9 girls. During the session, we encouraged open conversations about menstruation, giving the girls a safe space to ask questions and share their thoughts. We wanted them to know they are not alone and that every period experience is unique.

At the end of the workshop, each girl received 10 reusable pads, made possible by the incredible support for our November Reusable Pad Campaign. Thank you to everyone who contributed—you are making a real difference in the lives of these young girls!

Educating the mind without educating the heart is no education at all

Sunrise
Rotary

happy
WOMEN'S
day

It's incredible how a generous donation can make such an impact in a person's life! A huge thank you to Sunrise Rotary in the USA for doing just that. Sunrise Rotary has been a huge supporter in our partnership with the Mwandi Strikers football team. This month the team received new uniforms, new shoes and a years worth of transport to home-away games! Can you imagine the feeling of receiving new shoes for the first time in your life? Would your smile be any bigger than this?

LET'S GO SOLAR!

As you may know, Zambia is facing one of the worst droughts in a century. With our electricity supply heavily dependent on water, we've been experiencing daily blackouts of over 8 hours, and experts predict this could last for years. Going solar isn't just a choice; it's a necessity. Without electricity, we struggle to pump clean water from our borehole, the women in our sewing circle lose valuable hours of work, and keeping food fresh becomes a daily challenge. Plus, having fans to combat the heat would make an incredible difference!

We're asking for your support to help us switch to solar power. Every little bit helps, and together, we can create a lasting solution for our community. Will you join us in making this happen? **Please contact us at baobuyulearningcenter@yahoo.com or Venmo @Katiolive**
